**Project Edition 03 - Week Ending 12 January 2018**

## **Parish Hall Kitchen Refurbishment Project**

### **Week Two**

The main focus this week has been to prepare the roof in readiness for the new slates.

Firstly the old concrete tiles, old lathes, and old felt, had to be removed.

The rafters were generally in good condition and if any were showing signs of rot, especially where they rested on the outside wall, they were repaired.

All the roof timbers were treated for added protection against future rot and any infestation.

Supported by

**The National Lottery**<sup>®</sup>

through the Heritage Lottery Fund

# Parish Hall Kitchen Refurbishment Project

## Working on the Roof

This photograph shows that the old tiles, lathes and felt are stripped from the roof. Mark is working on the roof to fix the new membrane and new lathes.

This photograph shows the new membrane has been fixed and the tiling lathes being spaced and fixed.

The final lathes are being fixed. Lead flashing will be added to make a water tight seal between the cob wall of the Hall and the new tiled roof.

Natural slate tiles are being used. This week they arrived on site and are now ready to fix. Firstly the new Velux roof windows needed to be installed.
